The general conditions of control cabinet builders are diverse. This is why the processes and the requirements for their optimisation differ.

The challenges in control cabinet building cannot be met using just standard solutions; instead, they require an adapted approach using a flexible solution portfolio, modular systems, and a tailored consulting service.

With a partnership-based approach, our experts work with you to sustainably optimise and design your processes, from planning through to production.

Discover the potential for efficient working in your control cabinet building system

There is enormous potential for greater efficiency in control cabinet building. Every single process step, from engineering to the finished control cabinet, offers the opportunity to improve processes and save time and costs. Discover our modular and scalable solutions for efficient control cabinet building. In addition, Phoenix Contact provides you with innovative products for all the functional areas of the control cabinet. This means that we can provide you with support throughout the entire control cabinet building process. Find out more about the potentials within the individual process steps and gain an overview of our products, solutions, and services.

How to use this book

The first section of this guide showcases printers and bundled offers at compelling promotional prices, alongside a selection of essential tools. The second section focuses on best-selling consumable materials designed to keep those tools performing at their best, helping you maximise value, improve efficiency, and get the most out of every purchase

Build your Automated Cabinet Efficiency Bundle

- ✔ Fast and precise processing of different wire materials
- ✔ Robust and durable automatic tools due to the use of low-wear components
- ✔ Everything from a single source with the comprehensive product range

Automate some steps in your production processes, even for small and medium quantities. Achieve consistently high-quality work results with the automatic tools for precise and fast processing of conductors and cables. We understand that users have different needs based on application and volume and are pleased to introduce this promo. Select the printers that meet your needs and be on your way to a complete solution customised for you.

Control Cabinet Building in Germany

A study conducted in cooperation with the Ruhr University Bochum on behalf of Phoenix Contact

A detailed review of control cabinet building in Germany

- › What is the current situation in project planning and engineering?
- › What are the challenges that control cabinet builders face in these areas?
- › In which areas of the company are there the greatest capacity bottlenecks?
- › Which systems and software solutions are used?

Phoenix Contact Service Level Agreement (SLA) Printers & Automatic Tools

Keep Your Operation Running

Protect critical workshop assets with preventative maintenance, factory-certified servicing and lifecycle management support for Phoenix Contact printers and automatic tools.

Why Choose a Phoenix Contact SLA?

Reduce Downtime

Maintain operational readiness and minimise unexpected equipment failure.

Improve Equipment Reliability

Ensure printers and automatic tools remain production-ready.

Extend Equipment Lifecycle

Protect your investment through scheduled preventative maintenance.

Gain Lifecycle Visibility

Receive reporting, asset condition insights and upgrade recommendations.

Access Certified Support

Factory-trained technicians using genuine Phoenix Contact spare parts.

What is Included?

- ✓ Quarterly scheduled site visits - Preventative maintenance and operational assessment.
- ✓ Equipment inspection & cleaning - Maintain operational performance and reliability.
- ✓ Firmware & software updates - Ensure optimal system functionality where applicable.
- ✓ Operational testing - Includes test prints and crimp sample verification.
- ✓ Asset lifecycle reporting - Condition assessment, obsolescence planning, and upgrade recommendations.
- ✓ Genuine Phoenix Contact Support - Certified technicians and official spare parts availability.
